[Download](#) [1] World Cancer Research Fund International ([WCRF](#) [2]) infographic showing strong evidence that there are now 10 cancers linked to being overweight or obese. ~~World Cancer Research Fund International (WCRF) infographic showing strong evidence that there are now 10 cancers linked to being overweight or obese. The infographic lists 10 cancers: colorectal, endometrial, gallbladder, kidney, liver, pancreatic, prostate, stomach, thyroid, and uterine. It also shows that being overweight or obese increases the risk of these cancers.~~
